PROJECTS

Online Timetable Generator (Lin k)

- Developed a web-based Online Timetable Generator system designed to simplify the scheduling process for educational institutions by automatically generating conflict-free timetables for students, faculty, and administrators.
- **Multi-login system:** Separate login modules for Admin, Staff, and Students.
- **Automated timetable creation:** System generates timetables based on courses, subjects, faculty availability, and time slots.
- **Conflict detection:** Prevents overlapping sessions by validating faculty schedules and classroom availability.
- **Editable schedules:** Allows Admin and Staff to update, modify, or regenerate timetables as needed.
